

**IMPATIENS**

*(Impatiens New Guinea Group)*

**Proposed denomination:** 'SAKIMP061'  
**Application number:** 20-10249  
**Application date:** 2020/05/20  
**Applicant:** Sakata Seed Corporation, Yokohama, Japan  
**Agent in Canada:** BioFlora Inc., St. Thomas, Ontario  
**Breeder:** Chihiro Sato, Nagano, Japan

**Description:**

PLANT: short foliage height, narrow to medium width  
SHOOT (UPPER PART): absent or very weak intensity of anthocyanin colouration

LEAF BLADE: short, narrow to medium width, very small to small length to width ratio  
LEAF BLADE (UPPER SIDE): no marking, weak intensity of anthocyanin colouration  
LEAF BLADE (LOWER SIDE): green between veins, green veins  
PETIOLE: short, absent or very weak intensity of anthocyanin colouration on upper side

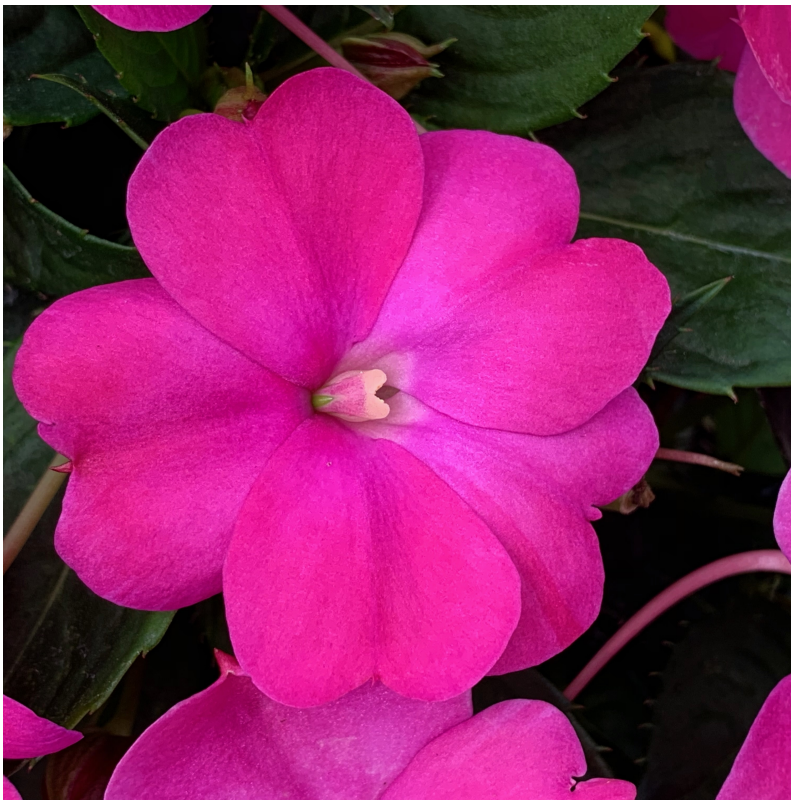

PEDICEL: short to medium length, absent or very weak intensity of anthocyanin colouration  
FLOWER: single type, narrow to medium width, one colour  
COROLLA (INNER SIDE): medium purple (RHS NN78C)  
EYE ZONE: small to medium size, light violet (RHS 75C)  
UPPER PETAL: narrow to medium width  
LATERAL PETAL: medium width  
LOWER PETAL: medium length

**Origin and Breeding:** 'SAKIMP061' originated from an interspecific hybridization conducted by the breeder, Chihiro Sato, in Misato, Japan. The hybridization was made between the female parental line 'NP-1663w' and the male parental line 'NK-357-1H-36H' in April 2016. The resulting F1 progeny was evaluated in a field trial in Misato, Japan. A single plant was selected based on its growth habit, flower colour and rooting characteristics. The selection was vegetatively propagated and evaluated in another open field trial from June to August 2017, after which it was subsequently named 'SAKIMP061'.

**Tests and Trials:** The detailed description of 'SAKIMP061' is based on the UPOV Report of Technical Examination, application number 2020/2444, purchased from Community Plant Variety Office in Angers, France. The trials were conducted by the Bundessortenamt in Hannover, Germany in 2021. Colour determinations were made using the 2015 Royal Horticultural Society (RHS) Colour Chart.
